

Belgium: the heart of our vaccines

We have 3 important vaccines sites in Belgium.

Our infrastructure represents the largest, integrated industrial network of vaccines, from early discovery, through development, all manufacturing steps and export.

What we do

We produce innovative vaccines and specialty medicines to prevent and treat diseases.

Our research focuses on the science of the immune system, human genetics and cutting-edge technologies.

Our collaborators in Belgium

Our Rixensart, Wavre and Gembloux sites count 9,000 collaborators, including 1,800 scientific researchers, representing > 80 nationalities.

22%
workers.

35%
employees.

43%
managers.

Wavre – This site is the heart of our vaccines business. It is the largest vaccine production site in the world, equivalent to

70 football fields.

Our colleagues responsible for the distribution of our vaccines and medicines in Belgium and in Luxembourg are also located in Wavre.

Our sustainable development strategy

A healthy planet for healthy people.

To support GSK's vision, we focus on 4 areas in Belgium: Energy & Carbon, Water, Waste and Biodiversity.

Our ambitions for 2030:

- to be carbon neutral and
- have a net positive impact on nature

Our vaccines are exported to >160 countries.

We are the largest Walloon exporter: our vaccines account for >10% of exports.

70% of manufacturing time is dedicated to quality controls.

Our commitment to Global Health

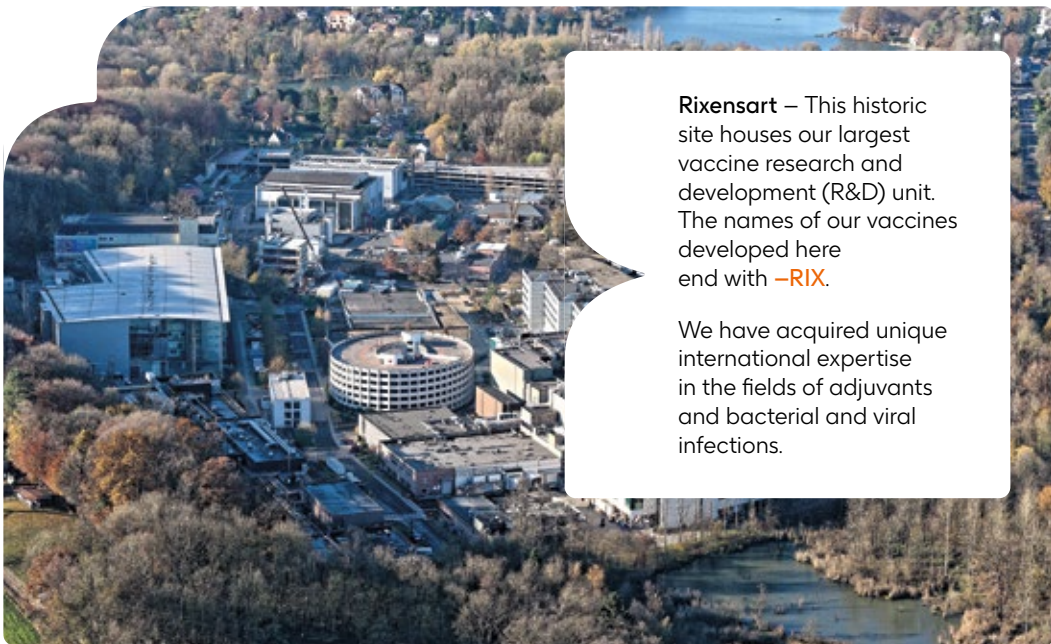

GSK will invest >€1 billion over the next 10 years to accelerate health-focused R&D in developing countries.

We have always been top of the Access to Medicine Index since its creation.

Every minute, a child dies of malaria in Sub-Saharan Africa. Our malaria vaccine is the 1st vaccine approved and the only vaccine against a human parasite. It was developed in Rixensart, and is currently manufactured there. This vaccine was also amongst the finalists of the essencia Innovation Award in 2022.

GSK is one of the main suppliers of vaccines for

Rixensart – This historic site houses our largest vaccine research and development (R&D) unit. The names of our vaccines developed here end with **-RIX**.

We have acquired unique international expertise in the fields of adjuvants and bacterial and viral infections.

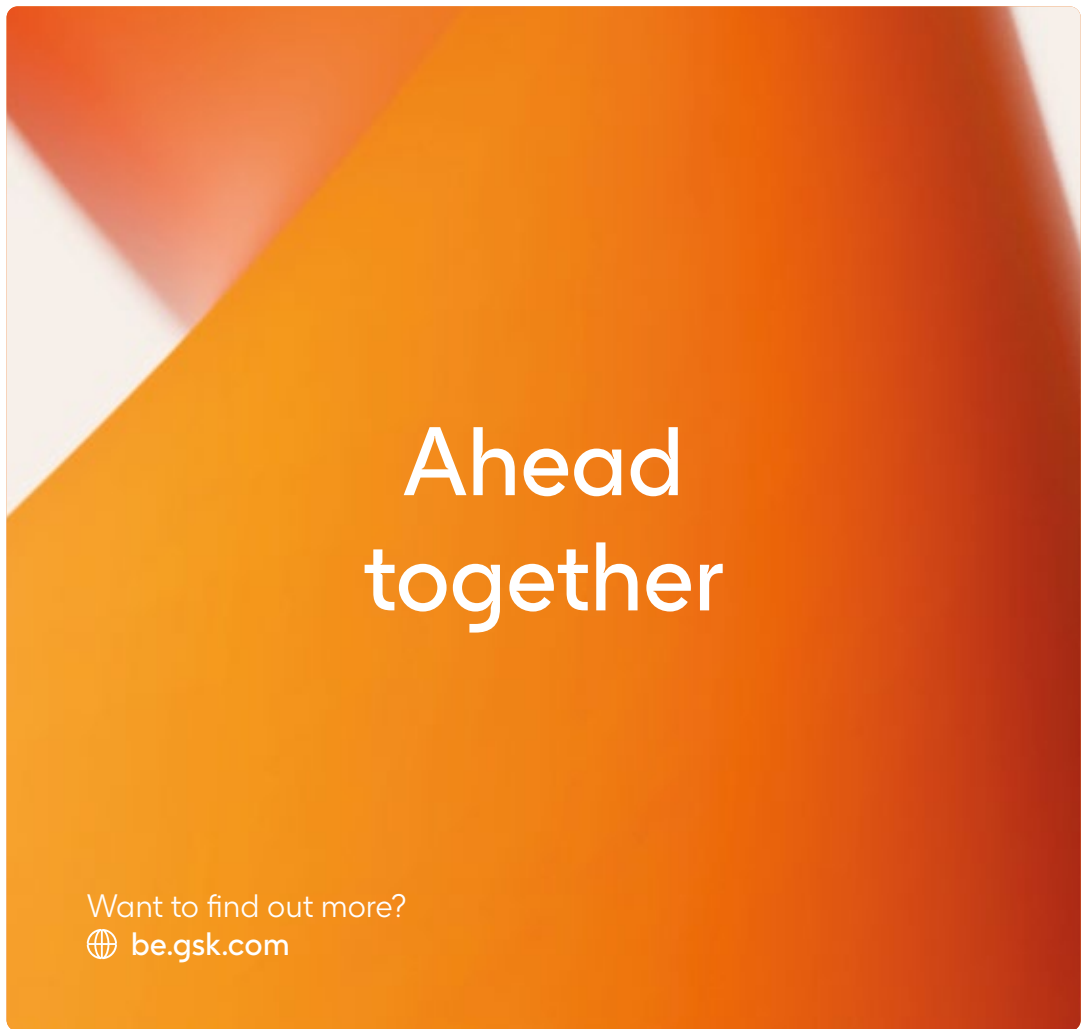

> 20 candidate vaccines in research & development as well as > 20 scientific collaborations with Belgian universities and research centres.

37 clinical trials in 2022 in Belgium, involving 1,800 volunteers.

> €1 billion invested in R&D in 2022.

Gembloux – Construction of a new, unique, ultra-modern centre dedicated to the storage and export of our vaccines.
